	Report casing preasure in Heu of tubing pressure for any wall producing through casing. Mall original and one copy of this report to the district office of the New Maxico Oil Conservation Commission in accordance with a 301 and appropriate pool rules.	sased allowables when authorized by the Commission. Gas volumes must be reported in MCF measured at a pressure base of 15,025 psia and a temperature of 60° (1) to 0.60.	No well will be assigned an allowable greater than the amount of oil produced on the official test. During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is founded by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned					Jullie Comm Jullie Comm	רה אאת		Vilco Building	or Roger C. Hanks
