(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Texaco plans to test the casing integrity of the subject well by pressuring up on the 5 1/2" casing to 500 psi for 15 minutes. This work is planned to be performed in February, 1988. Arrangements will be made with the BLM so that one of its technicians may be present to witness the test. The well was originally TA'd and tested on March 11, 1987.

Texaco requests permission to retain the subject well under TA status for purposes of converting it to SWD, pending the outcome of a proposed recompletion of the State "K" 6096-A Well No. 1, one mile to the northeast of the subject well. With a successful recompletion, it is anticipated that a water disposal capability of 500 BWPD will be needed. In this event, the subject well would be converted to SWD. Otherwise, the subject well would be P&A'd.

18. I hereby certify that the foregoing is true and correct
