RE: Request for 30 day test ✓
Coquina Oil Corporation
Bass State #1-E well
North Burton (Penn) Field
Loc: Sec 32, T19S, R29E
Eddy Co., New Mexico

Dear Sir:

This well is a gas well which must be produced by pumping with the gas being compressed in order to get the gas into the gas line. The well has been SI by the gas purchaser since early June, 1986. On 8/13/86, we tested the well while venting the gas and got the following results.

P. 24.75 BO, 25.4 BW, 24 hrs. Gas 8.41 MCFPD, GOR 340.

In order to determine the capacity of this well and to determine as to how we should classify this well, we ask permission to conduct a 30-day test while venting the gas, so that we may be able to determine the capacity of the well to produce oil. Production of oil, gas, and water will be measured daily. Every precaution will be made to protect livestock and residences if any are nearby; we propose to end the 30 day test period on September 10, 1986.

Sincerely,

COQUINA OIL CORPORATION

J. B. Taylor
