Attention: Mr. W. A. Gressett

Gentlemen:

This office received your letter dated September 7, 1979 denying approval of the Packer Leakage Test dated 8-20-79 to 8-22-79 on the subject well.

We would like to submit the attached well history and request this well be exempted from the Annual Packer Leakage Test. It is our opinion the Morrow production tubing was leaking between the packers and by setting the PSI plug in the profile at 11,512', the Morrow zone and the Atoka zone have been effectively isolated.

If you concur with this request, please advise.

Yours very truly,

By RC Anderson 9-10-79

R. C. ANDERSON
