Please issue allowables effective February 21, 1978. Lease casinghead gas connection made February 21, 1978 in accordance with Statwide Rule 306. Cancel Rule 306 exception.

RECEIVED

FEB 22 1978

O.C.C.
AREA, OFFICE

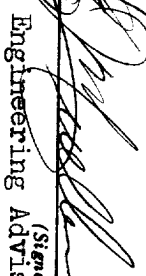

No well will be assigned an allowable greater than the amount of oil produced during gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased allowables when authorized by the Commission.

Gas volumes must be reported in MCF measured at a pressure base of 15.025 psia and a temperature of 60° F. Specific gravity base will be 0.60.

Report casing pressure in lieu of tubing pressure for any well producing through casing.

Mail original and one copy of this report to the district office of the New Mexico Oil Conservation Commission in accordance with Rule 301 and appropriate pool rules.

is true and complete to the best of my knowledge and belief.
