

Item 9

Attached is a rig diagram for the Marcum Rig #6. The pad size will be 60' to the North of the well, 200' to the South of the well, 150' East of the well, and 160' W of the well. The pit will be plastic lined and the well has been staked and flagged. BOP diagram included.

Item 10

After completion of drilling the area will be cleaned up and leveled as nearly as possible to its original condition as stated in Item 6.

Item 11

The topography of this area is very rugged with the ground level elevation changing as much as 300' in the area near the well. The land has little commercial use except for grazing. No residences are located within a mile of the proposed location. All land which will be crossed by roads or used for the drilling pad will be government land.

Item 12

The representatives responsible for assuring compliance with the approved surface use and operations plan are as follows:

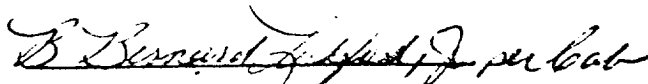

Mr. Martin Boggs  
P O Box 1273  
Carlsbad, New Mexico 88220  
Office Phone: 505-885-2171  
Home Phone: 505-885-5447

Mr. David Ahalt  
1800 First International Bldg.  
Dallas, Texas 75270  
Office Phone: 214-748-8511  
Home Phone: 214-242-9264

Item 13

I hereby certify that I, or persons under my direct supervision, have inspected the proposed drillsite and access route; that I am familiar with the conditions which presently exist; that the statements made in this plan are, to the best of my knowledge true and correct; and, that the work associated with the operations proposed herein will be performed by Southern Union Supply Company and its contractors and subcontractors in conformity with this plan and the terms and conditions under which it is approved.

July 4, 1977

  
B. Bernard Lankford, Jr.  
Consulting Engineer for  
Southern Union Supply Co.
