Eddy County, NM

Dear Sir:

I am returning your Form C-103s concerning the running and cementing of your 8 5/8" casing.

It is unclear to me as to what you pumped and the amount pumped. Please explain how you pumped cement after you dropped the plug, as per the enclosed C-103.

Our records show you pumped 400 sacks of RFC plus 550 sacks of 50/50 Poz III with 4% Benonite, 10# sack Gilsonite, 1/4# sack floceal, 2% CC plus 200 sacks Class C during the primary cementing.

On the 1" of the 8 5/8" casing, we showed you pumped a total of 600 sacks of cement plus 250 sacks sand plus 5 yards of redi-mix.

Your immediate attention to this matter will be appreciated. Please do not hesitate to call if any questions should arise.

Sincerely yours,

Mike B. Williams  
Oil & Gas Inspector
