

9. Wellsite Layout: (Cont'd)

- C. The reserve pit will be plastic lined.
- D. The pad and pit area has been staked and flagged.

10. Plans for restoration of the surface:

- A. After completion of drilling and/or completion operations all equipment and other material not needed for operations will be removed. Pits will be filled and location cleaned of all trash and junk to leave wellsite in an aesthetically pleasing condition as possible.
- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. After abandonment of the well, surface restoration will be in accordance with the agreement with the surface owner. Pits will be filled and location will be cleaned. Rehabilitation should be accomplished within 90 days after abandonment.

11. Other Information:

A. Topography:

Land surface is rolling and hilly. From an elevation of 4500' at the wellsite, the land surface slopes toward the East.

B. Soil:

Soil is dirt and very rocky.

C. Flora and Fauna:

The vegetative cover is generally sparse and consist of shinnery oak, yucca and perenial native range grasses. Wildlife in the area is that typical of semi-arid desert land and includes coyotes, rabbits, rodents, reptiles, dove and quail.

D. Ponds and Streams:

There are no rivers, streams, lakes or ponds in the area.

E. Residences and Other Structures:

The nearest occupied dwellings are ranch houses occupied by Mr. Frank Runyon 1 1/2 miles Southeast and Mr. Tulk 2 miles West of the proposed location.
