Attn: Mr. Leslie A. Clements

Gentlemen:

Reference your letter of November 21, 1983, (copy attached) concerning the subject well's compliance with Rule 107.

This well was recompleted from the Morrow to the Bone Springs, July 26, 1982, by setting a CIBP and capping with cement. Subsequently, when we returned to the Morrow, September 27, 1983, the perforations 11,492'-11,508' and 11,566'-11,581' were still open. Reference the perforation record on the attached Completion Report. Also, perforated were the intervals 11,694'-11,712' and 11,724'-11,732'.

Our tubing is set at 11,396' and the top of the pay is at 11,492'. Since the tubing is only 96' above the pay, we are in compliance with Rule 107.
