

(10) PLANS FOR RESTORATION OF THE SURFACE

- (a) After completion of drilling and/or completion operations, all equipment and other material not needed for operations will be removed. Pits will be filled and location cleaned of all trash and junk to leave the well site in an aesthetically pleasing condition as possible.
- (b) Any unguarded pits containing fluids will be fenced until they are filled.
- (c) After abandonment of the well, surface restoration will be in accordance with the agreement with the surface owner. Pits will be filled and location will be cleaned. The pit area, well pad, and all unneeded access road will be ripped to promote revegetation. Rehabilitation should be accomplished within 90 days after abandonment.

(11) OTHER INFORMATION

- (a) Topography: Land surface, undulating to rolling sand dunes. The undisturbed elevation at the proposed wellsite is 3391.3'.
- (b) Soil: Soil is a deep, fine sand underlain by caliche.
- (c) Flora and Fauna: The vegetative cover is generally sparse and consists of yucca, shinnery oak, and perennial native grasses. Wildlife in the area is that typical of semi-arid desert land and includes coyotes, rabbits, rodents, reptiles, dove, quail and other birds.
- (d) Ponds and Streams: There are no rivers, streams, lakes or ponds in the area.
- (e) Residences and Other Structures: The nearest occupied dwelling is a ranch house 2-1/2 miles southeast of the well site. The nearest water well is located at the ranch house.
- (f) Archeological, Historical and Cultural Sites: None observed in the area.
- (g) Land Use: Grazing and hunting.
- (h) Surface Ownership: Surface is Federal land.

(12) OPERATOR'S REPRESENTATIVE:

The field representatives responsible for assuring compliance with the approved surface use and operations plan are as follows:

Gulf Oil Exploration and Production Company,
A Division of Gulf Oil Corporation
P. O. Box 670
Hobbs, New Mexico 88240
Telephone: (505) 393-4121
Area Production Manager: C. D. Borland
