

10. PLANS FOR RESTORATION OF THE SURFACE.

- A. After finishing drilling and/or completion operations, all equipment and other material not needed for further operations will be removed. Pits will be filled and the location cleaned of all trash and junk, so as to leave the wellsite in as aesthetically pleasing a condition as possible.
- B. Any unguarded pits containing fluids will be fenced until they have been filled.
- C. If the proposed well is non-productive, all rehabilitation and/or vegetation requirements of the BLM and the USGS will be complied with and will be accomplished as expeditiously as possible. All pits will be filled and leveled within 90 days after abandonment.

11. OTHER INFORMATION.

- A. The proposed wellsite is located in an essentially flat area. The proposed new access road crosses a generally flat area, with occasional gently rolling undulations.
- B. The topsoil at the wellsite consists generally of moderately soft sandy loam.
- C. Flora and Fauna: The vegetation cover at the proposed location is moderately heavy for semi-arid desert land, consisting of relatively heavy grass as well as mesquite, acacia, creosote, various types of cactus, yucca, desert holly, broomweed, and other miscellaneous desert weeds and flowers. No wildlife was observed other than lizards and jackrabbits, but it is likely that other typical semi-arid desert wildlife inhabit the area, which is used for cattle grazing.
- D. There are no ponds, lakes, or flowing streams or rivers in the vicinity of the wellsite.
- E. The nearest dwellings are about 2 miles northwest and 3 miles east of the drillsite. The nearest windmill is about 3/4 of a mile southeast of the location, within the same section (Section 4-T20S-R23E).
- F. The wellsite is on federally owned surface, with federal ownership of minerals.
- G. There is no evidence of any significant archeological, historical or cultural sites in the area of the proposed location. An archeological survey has been conducted by the Agency for Conservation Archaeology, Eastern New Mexico University, Portales, New Mexico.

12. OPERATOR'S REPRESENTATIVE.

The field representative responsible for assuring compliance with the
