

Willard B. Wagner, Jr., Esq.
The Superior Oil Company
Page 2.

When the hearing reopens I feel we should put on some geologic testimony, together with any other information available, to show that the area is probably productive of gas or oil in paying quantities. I believe the best we can hope for is to preserve a drill site in each half sections involved.

The hearing will probably reconvene either on March 19, or on Friday, March 21. I will let you know immediately when it will be held.

Sincerely,

Jason W. Kellahin
