Re: State CB Com #1, Unit letter O  
Section 29-19-28, Eddy County

Gentlemen:

No cement was pumped through the SC @ 6505' as noted on C-103. 120 bbls of mud was pumped thru SC @ 6505' and could not get circulation to surface. When pressure was released on mud, 40 bbls of mud flowed back. Therefore, to cement behind 4-1/2" casing, it was necessary to perforate above SC and squeeze cement behind casing.

Sincerely yours,

LeRoy Lane
