

2. Planned Access Roads continued . . .e. Cuts and Fills: None Requiredf. Gates and Cattleguards: None Required3. Location of Existing Wells

Existing wells within a one mile radius are shown on Exhibit "B".

4. Location of Proposed Facilities

Should this well be completed as a commercial producing well, new tank battery facilities will be required. These facilities will be constructed within the 400' X 400' work area as staked. All lines will be installed above ground and located as shown on Exhibit "C".

5. Location and Type of Water Supply

Water for drilling well will be purchased from a supplier and transported by truck over roads shown in Exhibit "B".

6. Source of Construction Material

Caliche for surfacing the well pad and road will be obtained from existing Federal pits in the SW/4 of the SE/4 of Section 30, T-25-S, R-25-E or in the SW/4 of the SW/4 of Section 5, T-21-S, R-24-E.

7. Methods of Handling Waste Disposal

a. Drill cuttings will be disposed of in the drilling pits.

b. Drilling fluids will be allowed to evaporate in the drilling pits until pits are dry.

c. Water produced during tests will be disposed of in the drilling pits. Oil produced during tests will be stored in test tanks until sold.

d. Current laws and regulations pertaining to the disposal of human waste will be complied with.

e. Trash, waste paper, garbage and junk will be buried in a separate trash pit and covered with a minimum of 24" of dirt. All waste material will be contained to prevent scattering by the wind. Location of trash pit is shown on Exhibit "D".

f. All trash and debris will be buried or removed from the well site within thirty (30) days after finishing drilling and/or completion operations.

8. Ancillary Facilities

None
