Re: State G Com.  
#1-E-24-19-27  
Eddy County, NM

Gentlemen:

We hereby acknowledge receipt of the Completion Reports on the subject well.

The logs have been correlated with the Nomenclature Committee Cross Sections, and, according to our Geologist, the tops are as follows: Penn-8629, Strawn-9346, Atoka-10048, Morrow Lime-10402, and Morrow Clastics-10490.

According to the above tops you have perms 10373-10378 in the Atoka and the balance in the Morrow. Therefore, the upper set must be blanked off, or you must apply to Santa Fe for a hearing for down hole commingling.

If you have any questions concerning this matter, please feel free to contact me.

Sincerely,

W. A. Gressett  
Supervisor, District II
