Gentlemen:

A compressor was installed on July 22, 1981 on Gulf's Eddy "IL" State Com #1 well located in Unit E, Section 30-T19S-R29E, Eddy County, New Mexico. First gas sales was made at 1:30 PM to El Paso Natural Gas Company on this date. This well produced 216 MCFG for the month of July.

Whenever the compressor is started only enough gas to circulate in the compressor is produced. The compressor will then automatically shut down on high discharge temperature after a short period of time. This well has been closed in for the months of August and September.

This letter is to serve as notification of the well's current status in lieu of a multi-point back pressure test. A geological study is being performed for possible recompletion in another zone. Your attention to this matter is appreciated.

Yours very truly,

  
R. C. ANDERSON
