

- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. After abandonment, all equipment, trash and junk will be removed and the location cleaned. Any special rehabilitation and/or special revegetation requirements of the surface management agency will be complied with and accomplished as expeditiously as possible.

11. OTHER INFORMATION:

- A. Topography: The land surface is nearly level. Local slope is to the east and regional slope is to the north-east. See Attachment "C".
- B. Soil: Loamy
- C. Flora and Fauna: The vegetative cover at the drillsite is sparse, consisting of mesquite, greasewood and miscellaneous semi-arid range weeds and grasses. No wildlife was observed, but wildlife in this area consists mostly of rabbits, rodents, coyotes, reptiles, dove and quail.
- D. Ponds and Streams: None. A dry arroyo lies one-half mile to south and east.
- E. Residences and Other Structures: Nearest occupied dwelling is 2 miles to the southeast. Nearest windmill is $\frac{1}{4}$ mile to the north.
- F. Archaeological, Historical and Other Cultural Sites: None were observed in the area.
- G. Land Use: Grazing and occasional hunting.
- H. Surface Ownership: Federal
