13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Well was plugged back to 4400 ft. by previous operator, Enerloc Resources, Inc. Recently purchased by Nadel and Gussman, it is planned to test the Penrose interval 3800-3900 overall by perforating and stimulating as required for production. Surface head and equipment will be replaced/installed as required by results of production.
