

11. OTHER INFORMATION:

- A. Topography: Land surface is rolling and hilly. Well location was moved 212' to the northwest to move it out of South Bunting Draw. From an elevation of 4130' at the drillsite, the land surface slopes gently toward the southeast.
- B. Soil: Loam
- C. Flora and Fauna: The vicinity surrounding the drillsite is semi-arid desert rangeland. Vegetation consists of native grasses interspersed with greasewood, catclaw, yucca, cholla and other cacti. No wildlife was observed, but wildlife in this habitat consists mostly of rabbits, rodents, coyotes, skunks, dove and quail.
- D. Ponds and Streams: None. South Bunting Draw is 500' to the southeast.
- E. Residences and Other Structures: Nearest occupied dwelling is 4 miles to the north. Nearest water well is 3/4 mile to the northeast.
- F. Archaeological, Historical and Other Cultural Sites: None were observed in the area. An archaeological reconnaissance of the well pad and road area was made by the New Mexico Archaeological Services, Inc. on October 22, 1980.
- G. Land Use: Grazing and occasional hunting.
