Re: Bradshaw #1
Penasco Draw Upper Penn
P-04-19S-25E Eddy Co., NM

Dear Mr. Buckles:

A field representative from our office inspected the referenced well last week and found that part of the production casing had apparently been removed. He discussed this with an Anadarko employee and learned that approximately 2,600 feet of 4 1/2" production casing was removed in February, 1994 after the casing string was found parted at that depth.

Our files do not contain a Sundry Notice (Form C-103) concerning this work.

In its present condition, the well could be a threat to both water and hydrocarbon resources in the area. We therefore request that you begin operations to either repair or properly plug the well as soon as possible.

Please let us hear from you by August 1, 1994 concerning your plans. We appreciate your cooperation.

Very truly yours,

Jim H. Morrow
