

1. EXISTING ROADS:

- A. Exhibit "A" is a portion of a road map showing the location of the proposed well as staked. Point "A" on the plat is on US-285, 9 miles south of Artesia, New Mexico, at Milepost 59.9. To go to the proposed well site from this point, exit US-285 through the cattle guard onto a paved road and go west 3 miles. There is a gas plant here on the north side of the road. Continue southwest on the main road for 0.75 mile to a point where a good caliche road goes south. Turn south and go 1.2 miles and then west 1.3 miles to a north-south fence with cattle guards. Continue west through the south cattle guard on the road on the south side of the fence for 1.4 miles to a point where a caliche road goes southeast. Turn southeast and go to Yates well No. 2 Nicholas BJ and then southwest to Yates well No. 9 Mobil CI. The proposed well site is 990' south of this well.
- B. Exhibit "B" is a plat showing existing roads in the vicinity of the proposed well site. Existing roads are color coded.
- C. Any repairs to existing roads do not appear necessary at the present time.

2. PLANNED ACCESS ROAD:

- A. Length and Width: The new road will be 12 feet wide and approximately 900 feet long. The new road is labeled and color coded red on Exhibit "B". The center line of the proposed new road, from the beginning to the well site, has been staked and flagged with the stakes being visible from any one to the next.
- B. Surfacing Material: Six inches of caliche, watered, compacted, and graded.
- C. Maximum Grade: Two percent.
- D. Turnouts: None required.
- E. Drainage Design: The new road will be crowned with drainage to both sides.
- F. Culverts: None necessary.
- G. Cuts and Fills: None necessary.
- H. Gates and Cattle Guards: None required. No fences involved.
