FRACURE TREATMENT ☐

SHOOTING OR ACIDIZING ☐

(Other)

REPAIRING WELL ☐

ALTERING CASING ☐

ABANDONMENT ☐

(NOTE: Report results of multiple completion on Well
Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Reference is made to Item No. 4 of the Surface Use Plans for the subject wells which pertain to the proposed locations of the production and storage facilities.

Instead of constructing the tank batteries on the individual well pads, it is now proposed to construct the tank batteries and associated facilities at a central location near pipeline facilities. It will be located north of the east-west access road in the NE $\frac{1}{4}$ NE $\frac{1}{4}$ SW $\frac{1}{4}$ Sec. 1-19S-30E. A 200' x 200' work area has been archaeologized by the Agency of Conservation Archaeology. Flowlines from the subject wells will be laid on top of the ground to the central battery site. See attached plat.
