

9. WELLSITE LAYOUT:

- A. The wellsite has been surveyed and a 400' x 400' area has been staked and flagged.
- B. The dimensions and relative location of the well pad and drilling pit, with respect to the well bore are shown on Exhibit "D".
- C. The location is nearly level.
- D. The well pad will be surfaced with caliche.

10. PLANS FOR RESTORATION OF THE SURFACE:

- A. After completion of drilling and/or completion operations, all equipment and other material not needed for operations will be removed. Pits will be filled and the location cleaned of all trash and junk to leave the wellsite in as aesthetically pleasing condition as possible.
- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. After abandonment, all equipment, trash and junk will be removed and the location cleaned. Any special rehabilitation and/or special revegetation requirements of the BLM will be complied with and accomplished as expeditiously as possible.

11. OTHER INFORMATION:

- A. Topography: The terrain at the area surrounding the location is nearly level and slopes to the southwest. See Exhibit "B". Regional slope is also to the southwest.
- B. Soil: Top soil at the wellsite is sandy.
- C. Land Type & Use: The vicinity surrounding the drillsite is semi-arid rangeland and its primary use is for grazing.
- D. Flora & Fauna: Vegetative cover is sparse. Flora consists primarily of shinnery and yucca interspersed with range grasses and weeds. No wildlife was observed, however fauna for this type of habitat normally includes snakes, lizards, rabbits, rodents, coyotes, skunks, quail, dove, and other small birds.
- E. Ponds & Streams: None.
- F. Water Wells: There are no water wells within two miles of the drillsite.
