

3. LOCATION OF EXISTING WELLS: Existing wells in the vicinity of the proposed drillsite are shown on Exhibit "C".
4. LOCATION OF EXISTING AND/OR PROPOSED FACILITIES:
 - A. L.C. 029353(a) is a producing lease with the central tank battery located about 100' south-southwest of #1 McFadden Well.
 - B. If the well is productive, the proposed flowline will be laid on top of the ground and tied into the gathering system at the #3 McFadden Well.
 - C. Proposed electric line for Well #6 McFadden will be tied into north-south powerline running on the west side of the E $\frac{1}{2}$ NE $\frac{1}{4}$ of section.
5. LOCATION AND TYPE OF WATER SUPPLY: It is not planned to drill a water supply well. Water for leasehold operations will be purchased from a commercial water hauler.
6. SOURCE OF CONSTRUCTION MATERIALS: Caliche will be obtained from a State pit located in the NE-NW 2-19S-31E.
7. METHODS OF HANDLING WASTE DISPOSAL:
 - A. Drill cuttings will be disposed of in the drilling pits.
 - B. Drilling fluids will be allowed to evaporate in the drilling pits until the pits are dry.
 - C. Water produced during tests will be disposed of in the drilling pits.
 - D. Oil produced during tests will be produced into temporary test tanks.
 - E. Trash, waste paper, garbage, and junk will be buried in a trash pit and covered with a minimum of 24 inches of dirt. All waste material will be contained to prevent scattering by the wind. Location of the trash pit is shown on Exhibit "D".
 - F. All trash and debris will be buried or removed from the wellsite within 30 days after finishing each drilling and/or completion operation.
8. ANCILLARY FACILITIES: None anticipated.
