Re: Annual Gas Well Shut-In
Pressure Test
Division Rule 402
Huber Federal #2G
Sec. 3, 20S, 25E
Eddy County, New Mexico

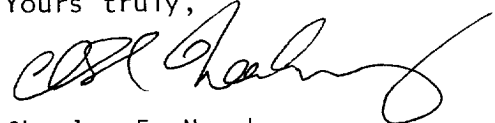

Dear Mr. Clements:

Please be advised that we are in receipt of Mr. Joe Ramey's Memorandum regarding annual gas well shut-in pressure tests for 1983. The list of wells operated by Chama which accompanied the memo reflects the Huber Federal #2 well.

On May 19, 1983, you granted an exception to Division Rule 402 for our Huber Federal #1 well. As the Huber Federal #2 well also produces from the Morrow formation, with the same problems and potential for damage as the Huber Federal #1; we hereby request that the Huber Federal #2 well be granted an exception to Rule 402. If for any reason the well is shut-in during the year, the annual gas well shut-in pressure test will be taken and the results reported accordingly.

As always, we appreciate your consideration of our request.

Yours truly,

Charles E. Nearburg
President
