Report casing pressure in lieu of tubing pressure for any well producing through casing. Ausi original and one copy of this report to the district office of the New Mexico Oil Conservation Division in see Rule 301 and appropriate pool rules.	No well will be essigned an ellowable greater than the amount of oil produced on the official test. During gas-oil rests, each well shell be produced at a rate not exceeding the top unit ellowable for the pool in w located by more than 25 percent. Operator 1s encouraged to take advantage of this 25 percent tolerance in order that well can increased allowobles when authorized by the Division. Gas volumes must be reported in MCF measured at a pressure base of 15.025 pais and a temperature of 60° F. Specifie will be 0.60							EWMEXICOOSTATE		T. U. DE K 1600 MID KAK Q			STATE OF NEW MEXICO
