**TO ALL GERONIMO FEDERAL NO. 6 PARTICIPANTS:**

RE: **Geronimo Federal No. 6**  
Section 24: T18S, R31E  
Lease No. NM-025777  
Eddy County, NM

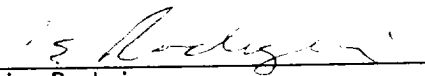

As reflected in your November, 1988 and December, 1988 LOE's, recent work was performed on the Geronimo Federal No. 6 well. This work involved the opening of the Penrose interval to production. In doing so, Siete successfully doubled daily oil production rates. The well is at present producing simultaneously from both the Penrose and Grayburg intervals.

Please find enclosed a copy of the Federal Sundry Notice submitted to the Bureau of Land Management on the Geronimo Federal No. 6 well. This notice describes the recent testing of the Penrose interval on the subject well and the results from the commingling of the above mentioned intervals.

Sincerely yours,

**SIETE OIL AND GAS CORPORATION**
