13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The Tamano (BSSC) Unit #506 is currently a shut-in producing well completed in the Bone Springs Second Carbonate which is the unitized interval. We have removed the well from the Unit and plan to do the following:

1. Plug back the Bone Springs Second Carbonate from 7924'-8204'.
2. Recomplete to the Grayburg from approximately 4160'-70'.
3. Change the well name back to the original well name prior to unitization Johnson "B" Federal A/C 1 #6 (Lease Designation LC-029388-D).

We estimate rigging up on 11/1/01 and requiring 6 days.

14. I hereby certify that the foregoing is true and correct
