17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Siete Oil & Gas Corporation proposes to lay approximately 3200' of 2 7/8" tubing on surface to serve as a temporary gas line. The subject line will connect the Osage Federal No. 8 Atoka gas well to the El Paso Natural Gas Company - Gathering System located in the SW $\frac{1}{4}$ SW $\frac{1}{4}$  of Section 34, T19S, R29E. This line is intended to test the gas reserves of the well before additional capital expenditures of approximately \$70-\$80M dollars are spent for a permanent line. A test period not to exceed 90 days should be sufficient to evaluate this completion.

Ms. Cecilia Johnson of the BLM in Carlsbad gave Mr. Harold D. Justice on Dec. 12, 1989 verbal permission to begin laying the line. The test period will commence on day of first sales. Gas contract negotiations are currently underway with EPNG.
