	<input type="checkbox"/> Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Propose to return well to perforations 8897-8907' (Morrow) as follows:

1. POOH with production equipment.
2. Load well before attempting to pull RBP at 8758'. If well will not load, decision may be made to cement squeeze perforations 7636-7747' (Canyon) and drill out perforations.
3. GIH with retrieving tool and check for trash on RBP at 8758'. If no fill, pull RBP. If there is fill, will bail or circulate to clean off. May be necessary to cut over RBP.
4. GIH with tubing and latch onto Baker Lok-Set packer at 8878' with on/off tool with 2.31" ID and standing valve.
5. Space out, remove BOP and install tree.
6. Swab Morrow in. Acidize as necessary for production.
7. Release well to production department.

NOTE: If perforations 7636-7747' (Canyon) are not squeezed, will be left open to casing.

14. I hereby certify that the foregoing is true and correct
