

9. WELL SITE LAYOUT:

- A. Exhibit "D" shows the relative location and dimensions of the well pad, reserve pits, and major rig components. The pad and pit area has been staked and flagged, 400' X 400'.
- B. Mat Size: 250' X 140', plus 85' X 75' reserve pits.
- C. Cut & Fill: None required.
- D. The surface will be topped with compacted caliche and the reserve pits will be plastic lined.

10. PLANS FOR RESTORATION OF THE SURFACE:

- A. After completion of drilling and/or completion operations, all equipment and other material not needed for operations will be removed. Pits will be filled and the location cleaned of all trash and junk to leave the well site in an aesthetically pleasing a condition as possible.
- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. If the proposed well is non-productive, all rehabilitation and/or vegetation requirements of the Bureau of Land Management will be complied with and will be accomplished as expeditiously as possible. All pits will be filled and leveled within 90 days after abandonment.

11. OTHER INFORMATION:

- A. Topography: The well site and access road are located in the Querecho Plains 1.5-2 miles east of the Nimenim Ridge with the proposed site on a very level location with a .5% slope to the southwest from an elevation of 3523'.
- B. Soil: The topsoil at the well site is a gravelly fine sandy loam of the Simona soils Series, which is overlying caliche rock that also makes up the surface rock scatter.
- C. Flora and Fauna: The vegetation cover is a good grass cover of three-awn, dropseed, grama and other misc. native grasses along with plants of mesquite, snake broomweed, javelina bush, creosote bush, cacti and miscellaneous weeds and wildflowers. The wildlife consists of rabbits, coyotes, rattlesnakes, lizards, dove, quail and other wildlife typical of the semi-arid desert land.
- D. Ponds and Streams: None in area.
- E. Residences and Other Structures: None in the immediate area.
- F. Land Use: Cattle grazing.
- G. Surface Ownership: The proposed well site and access road is on Federal surface and minerals.
