Dallas, Texas 75202

Dear Mr. Shackleford:

Enclosed please find ASC Report 91-44, covering the archaeological survey of the Woodbine Petroleum, Inc., Hadson Federal Well No. 3, and a 150 ft. wide combined access road/powerline R/W. The survey was requested by your agent, Wilbur Shackleford, in compliance with relevant federal regulations.

Since no significant archaeological materials were found, we have recommended archaeological clearance for the well pad and combined access road/powerline R/W. Copies of the report have been distributed as per the list on the title page, and you need not concern yourself with distribution to those agencies.

Also enclosed, please find ASC Invoice 91-44, for performance of the survey.

We are pleased to have been of service with this project, and hope to assist you in the future. Should you have questions concerning the project, please call our office.

Sincerely,

D. M. Griffiths.

D.M. Griffiths
