13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The reason for the temporary abandonment is that waterflood in the Shugart Yates / Seven Rivers/ Queen has been very successful and the #7 well will likely be converted and used for injectin support in the future secondary operations.

The well was TA'd in September 1994 with a CIBP set @ 2,875' (50' above top perf). The casing was tested to 500 psi for 30".

Great Western Drilling would like to respectfully request another one year extension for the temporary abandonment status of this well.
