

## **YATES PETROLEUM CORPORATION**

Thomas AJJ Deep Com. #3

Drilling Prognosis

Page 2

Yates Petroleum Corporation proposes to re-enter this existing well bore. The 9 5/8" and 7" casing are set and cemented in place. A pulling unit will squeeze off the existing perforations (7,748'-7,840'), and clean out the well to the old TD of 8,230'. A drilling rig will then move in and deepen the well to 9,350' with a 6 1/8" bit. The 4 1/2" liner will then be set from 7,650-9,350' and cemented in place with 200 sx Super C Modified.

MUD PROGRAM: 0-8,320' Cut Brine (Weight: 9.0-9.2, Vis: 30-34).  
8,320'-9,350' Salt Gel/Starch/Drispac (Weight 9.2-9.8 Vis 30-38).

BOPE PROGRAM: 3000 # BOPE will be nipped up on 7" casing.
