13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is discontinuously drilled, give subsurface locations and measured and true vertical depths for all sections and zones pertinent to this work.)

On 1/27/94, we perforated the Queen Sand in this new well from 3641'-3658' (1 spf) and 3758'-3764', 3802'-3804' and 3809'-3812' (2 spf). The perfs were acidized with 1750 gals 15% HCl acid + ball sealers. The perfs were fraced on 2/2/94 with 30,503 gals x-link gelled 2% KCl water + 50,000 lbs 20/40 sand and 23,000 lbs 16/30 sand. The well was opened immediately following the frac for forced closure flowback. Currently, we are recovering the load and testing.
