

8. ANCILLARY FACILITIES:

- A. On-lease R-O-W is requested to construct a 2" steel flow line on the surface beside the access road from No.3 well to the battery at the No.1 well.

9. WELL SITE LAYOUT:

- A. The wellsite, surrounded by a 400' X 400' area, has been surveyed and flagged.
- B. Dimensions and relative location of the drill pad and pit are shown on EXHIBIT C.

10. PLANS FOR RESTORATION OF THE SURFACE:

- A. After completion of drilling and/or completion operations, all equipment and other material not needed for operations will be removed. Pits will be filled and the location cleaned of all trash and junk to leave the wellsite in an aesthetically pleasing condition as possible.
- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. If the well is non-productive, the disturbed area will be rehabilitated to Federal Agency requirements and will be accomplished as expeditiously as possible.

11. OTHER INFORMATION:

- A. Topography: The wellsite slopes to the south.
- B. Soil: The surface soil is sandy loam with caliche and chert inclusions.
- C. Flora and Fauna: Vegetation consists of mesquite, greasewood and various weeds and grasses. Ground cover is about 5%. Wildlife in the area is that typical of semi-arid desert land, such as rodents, reptiles and small birds.
- D. Ponds or Streams: Seasonal Hackberry Lake is 1 mile southeast.
- E. Residences and Other Structures: The Horizon Potash Corporation mine shaft and refinery are located about 5 miles northwest. The Eddy Potash mine shaft is located 7 miles southwest. There are no residences in the area.
