13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

It is proposed to change the cementing program in the approved APD for this well to the revised program attached to this sundry. The only change is in the number of sacks of cement used for the production string. The revised program calls for a cement top at 6,000' instead of the surface.
