Re: West Shugart "30" Federal  
Sec. 30, T18S, R31E

Dear Sir or Madam:

Please, consider this our request to dually complete the subject well. The well is currently producing from the Wolfcamp zone, perforated at 10,130' - 10,151' and the Morrow zone perforated at 12,047' - 12,053 and 12,084 - 12,089. Production is separated with a dual packer and tubing assembly as shown on the attached packer detail and described in the attached tubing detail.

Your administrative approval of our request will be appreciated. If you have any further questions, please, contact John Gray with Penwell Energy, Inc.

Yours truly,

Brenda Coffman

BSC/bsc
