Re: Featherstone State ✓
Well No. 2P, 18-19-28
Millman-Grayburg Pool,
Eddy County.

Dear Mr. Plemons:

According to our records the subject well was completed as a producing oil well on February 18, 1974, however, monthly production reports filed by you since that time do not reflect production by this well but credit all production to the old well No. 1. A recent field inspection of this lease indicated that Well No. 1 had been shut in for some time and that apparently all production was coming from Well No. 2.

Please review this matter and file a single corrected Form C-115 reflecting the month, produced volume, and proper well or wells to which such production is to be credited.

Very truly yours,

R. L. STAMETS
Technical Support Chief

RLS/og
