13. Outline Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. SEE RULE 1103.)

On August 6, 1965, a Tracer Survey was run on this well in order to ascertain the reason for the recent decline in production. This Survey indicated there was a hole in the casing at 1942' and 1960' and that fluid was being produced from the lower set of perforations and that the upper set of perforations from 1906 - 1935' did not appear to be open.

It is my intention to plug the hole back with sand to approximately 1965', to then set a packer at approximately 1800' and squeeze the balance of the hole in order to shut off the 2 holes in the existing perforations from 1906 - 1935'. I will then sand drill the upper zone at approximately 1900' in an attempt to reestablish production from this zone.
