Re: State
#2-P, 18-19-28
Eddy County, N. M.

Dear Mr. Plemons:

We are returning the enclosed Form C-101 on the subject well for additional information.

According to our records, the original perforations were from 1930-34 and 1940-46; then in 1960, we received a Notice of Intent to perforate from 1902-20 and 1965-75 treat and return to production. However; we do not have a report showing that this was done. Based on this information, your proposal to PB to 1974 and put on production from Upper Grayburg Zones; I am not sure just what you propose to do. Form C-101 as a Plug Back is to be used when you are plugging back from one pool to another. When you are just plugging off some perforations within the same formation, Form C-103 should be used.

If you have any questions concerning this matter, please feel free to call upon me.

Sincerely yours,

OIL CONSERVATION COMMISSION

W. A. Gressett
