13 Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

On our original permit to drill, we had specified setting intermediate casing @ 3950' ±. We have since re-evaluated the depth at which we need to set this string of pipe. The new depth will be @ ± 3200', pending where we cut the Queen formation. John Qualls, of our office, discussed this situation with Mr. Jim Amos. Along with his verbal approval, Mr. Amos instructed us to submit this sundry notice of our intent. We intend to cement and circulate as before, with the exception of using a lesser volume of cement than earlier stated. The original estimated volumes were 1300 sks. The revised estimated volume is 900 sks. We are presently @ 3000' and should be setting pipe 6/26/98.
