13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen vertically or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent intervals and zones. Attach the Board under which the work will be performed or provide the Board No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

It is proposed to recomplete/plugback this well to the Avalon. No Morrow sands were encountered in this wellbore, and the Atoka (11,202-22') was unsuccessful. The only remaining potential in this well is the Avalon (6412-23'). A proposed procedure with wellbore schematics is attached. If approved, work will begin on 8/30/00 (or later depending on rig availability).
