13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)  
MOC had proposed to use 2000psi annular preventer while drilling 12-1/4" intermediate hole and may have not made it clear in our APD. We are requesting permission to use only a 2000psi single annular preventer while drilling this section of hole. We also want to assure you that we will run 5000 psi double ram and 3000psi single annular preventer along with other well control equipment stated in our APD while drilling (8-3/4") production section of this hole.

14. I hereby certify that the foregoing is true and correct
