13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

A permit to drill the subject well was approved 2/12/01 by the Bureau of Land Management. Due to significant lost circulation problems encountered to +1500' in the recently drilled Echo 'AWF' Federal #1, it is requested that two changes be made to the approved permit. The original permit stipulated that the well would be drilled with fresh water to 1900' with 13 3/8" casing being set at 350' and 8 5/8" casing being set at 1900'. We are now requesting that the well be air drilled to 1900' where 8 5/8" casing will be set and that the 350' of 13 3/8" casing not be utilized. As stipulated in the original permit, the 8 5/8" casing string will be cemented to the surface. The remainder of the programs outlined in the permit will not be changed.
