

## **MULTI-POINT SURFACE USE AND OPERATIONS PLAN**

### **RAY WESTALL TAYLOR UNIT #24**

This plan is submitted with form 3160-3, Application for Permit to Drill, covering the above described well. The purpose of this plan is to describe the location of the proposed well, the proposed construction activities and operations plan, the magnitude of surface disturbance involved, and the procedures to be followed in rehabilitating the surface after completion of the operations, so that a complete appraisal can be made of the environmental effect associated with the operation.

1. Existing Roads.  
Exhibit A is a portion of a USGS topographic map showing the wells and roads in the vicinity of the proposed location.
2. Planned Access Road.  
None.
3. Location of Existing Wells.  
Exhibit B is a topo map showing the existing wells.
4. Location of existing/or proposed facilities:  
If productive a 3" SDR 7 poly line will be laid along existing ROW located on the Taylor Unit Facility located in the NWSE of section 12. A 3 phase power line and poles will be routed along the existing ROW paralleling the road.
5. Location and Type of Water Supply.  
It is planned to drill the proposed well with fresh and brine water system. The water will be obtained from commercial sources and will be hauled to the location by truck.
6. Source of Construction Materials.  
The location and road will be from pit excavation and or will be hauled in from an approved caliche pit.
7. Methods of Handling Waste Disposal.
  - A. Drill cuttings will be disposed of in the reserve pit.
  - B. Drilling fluids will be allowed to evaporate in the reserve pits until the pits are dry.
  - C. Produced water during operations will be stored in reserve pits until dry.
  - D. Oil produced during operations will be stored in tanks until sold.
  - E. Current laws and regulations pertaining to the disposal of human waste will be complied with.
