DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was temporarily abandoned 10-31-59 at TD 6737' (with 1786' of 9-5/8" casing cemented in the hole) by spotting cement plugs at 6200', 2900', and 1730'. It is planned to re-drill this well to a depth of 9500', at which point 4-1/2" oil string will be set, using sufficient cement to adequately protect any oil or gas shows. The principal objective of the well is the **Narrow Gas Sand**, expected at approximately 9350'.
