DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Plan to drill a 500' Grayburg well to test the varies Grayburg sands that are productive to the east. Propose to drill this test with a cable tool rig, the size of the hole from the surface being 8 1/2". Should water be encountered before reaching total depth, propose to mud-in 7" casing for shut-off and reduce size hole to 6 1/4". Should water be encountered right out from under 7" casing, propose let 7" follow us down hole. Plan to pull 7" casing, run 4 1/2" casing with cement circulated to surface, in the event the test proves productive.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
