(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

November 26, 19 62

(Allis-Federal)

Well No. 1 is located 990 ft. from [N] line and 2210 ft. from [E] line of sec. 31

Section 31 T-21-N, R-24-E N.M.S.P.
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Artesia New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3823 ft. (G.L.)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I propose to drill a 500' Grayburg well to test both the Queen and various Grayburg sands which are productive to the east. Plan to drill with cable tools, 8 1/2" surface hole, run 7" cas. in case necessary for water shut-off, in which case the hole would be reduced to 6 1/2". Plan to pull 7" and run 4 1/2" production string, should production be encountered. Circulate cement should 4 1/2" casing be necessary.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
