(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

November 7, 1956

McKittrick Hills
Well No. 1 is located 981.6 ft. from (N) line and 1550.8 ft. from (E) line of sec. 23
(1/4 of Sec. 23) T22S R24E N M P M
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wildcat Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is Unknown at present. ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Drill surface hole to approximately 1000 feet and set 13 3/8" casing.

Drill 12 1/4" hole to approximately 3100 feet and run 9 5/8" casing.

Drill 8 3/4" hole to approximately 11,500 feet to test the Devonian formation.

If production is indicated, 7" casing will be set.

This location is on a long, narrow, steep ridge; shown on U.S.G.S. "West Carlsbad Quadrangle" topography map as "Azotea Peak." This is the only level spot in this section that a big rig can be located without enormous location expenditure.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
